

# Lysergia

## Velvet Acid Christ

Acid dreams and nicotine Violent screams from a mezzanine Seems to keep on propelling me Head first into a nightmare scene Through too many seamless nights When time to sleep is time for light Putting the nervous system on hold Reaching sleep depravation untold Keep an endless supply to the brain Getting even harder to maintain To keep grasp an even keel Before my adrenaline gods I kneel Social skills are shot to shit When paranoia starts to hit Reverse this feeling so screwed up Into delirium forced heads up Streching faces, melting clocks Stomach knots, the spine it locks Strangled by this fraying wire twisted sideways drifting higher Round and round and around again And to this night there is no end Lysergia Acid dreams and nicotine Violent screams from a mezzanine Seems to keep on propelling me Head first into a nightmare scene Reverse this feeling so screwed up Into delirium forced heads up Streching faces, melting clocks Stomach knots, the spine it locks Strangled by this fraying wire twisted sideways drifting higher Round and round and around again And to this night there is no end Lysergia.
