

# The Phrase That Pays

## The Academy Is...

My eyes can't believe what they have seen  
In the corner of your room  
You've stockpiled millions of my memories  
Oh doctor, doctor, I must have gotten this sick somehow  
I'm going to ask you a series of questions  
And I want them answered on the spot, right now  
Is it serious? I'm afraid it is, am I gonna die?  
Well, son, death is gonna catch up to all one day  
But yours is coming quicker than ours, than ours  
Some things I may have taken for granted  
Again and again, well, here's what was said then  
Hold your head high heavy heart  
So take a chance and make it big  
'Cause it's the last you'll ever get  
If we don't take it, when will we make it?  
I make plans to break plans  
And I've been planning something big  
Planning something big, planning  
I've never tried to make the best of my time  
When I thought that I had plenty of it  
Is this serious? I don't know what to think, is it all a lie?  
Well, one thing is for sure, I'm taken back to the glory days when  
When we were kids without a brash or bitter thing to say  
Now my life is one big, make it, or break it  
Hold your head high heavy heart  
And save your strength for the morning after  
So take a chance and make it big  
'Cause it's the last you'll ever get  
If we don't take it, when will we make it?  
I make plans to break plans  
And I've been planning something big  
Planning something big  
So take a chance and make it big  
'Cause it's the last you'll ever get  
If we don't take it, when will we make it?  
I make plans to break plans,  
And I've been planning something big  
Planning something big, planning  
Hold your head high heavy heart

And save your strength for the morning after  
So take a chance and make it big  
'Cause it's the last you'll ever get  
If we don't take it, when will we make it?  
I make plans to break plans  
And I've been planning something big  
Planning something big  
So take a chance and make it big  
'Cause it's the last you'll ever get  
If we don't take it, when will we make it?  
I make plans to break plans  
And I've been planning something big  
Planning something big, planning
