

# Show Me How

## Stereophonics

Blacken mood, I'm sick of you,  
It's time that you get out my life,  
You bring me down,  
Lack of sleep is killing me, I think it's time I close my eyes for a while. I almost touched it, but then it slipped  
right through my hands.  
Could almost see it, but then it slipped dropped out my mind. I want you to show me, I know you know how,  
To live every moment,  
Like they all count.  
Teach me to love you,  
Show me the light,  
'Cause I'm in the darkness,  
It's time I got out. Cracked and wounded, down and out,  
It's time the bleeding got cleaned up  
Stitch me up. I almost touched it, but then it slipped right through my hands.  
Could almost see it, but then it slipped dropped out my mind. I want you to show me, I know you know how,  
To live every moment,  
Like they all count.  
Teach me to love you,  
Show me the light,  
'Cause I'm in the darkness,  
It's time I got out. I want you to show me, just show me, then shine me the light  
Won't you show me, just show me, shine me the light.  
Won't you show me, just show me, shine me the light.  
Show me how, Shine  
the light on me, on me. Won't you show me how to live every moment, shine me the light of your soul, and  
teach me how to love like you do, like it's the last day of the world.
