Forever

Endless Blue

You huddle alone, you cave to your pain
You bruise and you bleed on your hands and your knees
And you take it again
So wipe off those tears, come in from the rain
Take my hand and see my new reality
See their torment in vain

Forever is never and never again
I'll wrap you in my arms and protect you when
The hatred draws closer and closer embrace
Together we'll fight it together we face
The world

We'll exchange our vows, an orange ring of flame
For with the right glance we'll see devils dance
All dispelled with my name
Not parted in death, our serenity
Our souls will move past all the scum and the trash
Into eternity

Forever is never and never again
I'll wrap you in my arms and protect you when
The hatred draws closer and closer embrace
Together we'll fight it together we face
The world
