

Sleep My Angel

Howard Jones

Sleep my angel it is time for bed
I will be there to watch over you
I'll protect you from the world
And the voices in your head I'll be with you
With my life I will defend
I'll be with you
I will be there in the end And I'll cry your tears
As you feel every pain
Coax out the sun
From the endless rain Thought I'd never feel
So much love for another
I'll be with you
I will be there in the end Love that is there
Through the false and the real
Love that desires
No reward and no gain As I hold your tiny hand
You'll never know how I feel
There's a promise, with my life I will defend
I will be there with you till the end And I'll cry your tears
As you feel every pain
Coax out the sun
From the endless rain Thought I'd never feel
So much love for another
I'll be with you
I will be there till the end All that potential bursting inside
Let me help you on your journey
Let me help you with life I will be there with you till the end
