

Cast Me Aside

Drowning Pool

So you think that you got it all figured out
I told you, you got no clue what it is all about
Now, you want to cling to the next big thing
Be part of the scene and ride the big machine
Well, it ain't gonna work out that way
Now, you want to cling to the next big thing
Be part of the scene and ride the big machine
Well, it ain't gonna work out that way
What, who, where were you when I was down on my luck?
You know you never gave a fuck, you just cast me aside
What, who, where were you when I needed you?
You know you never came through
And now you wanna come along for the ride
I told you I know you as well as you think you do
I showed you just how easy you are to see straight through
Now, you want to cling to the next big thing
Be part of the scene and ride the big machine
Well, it ain't gonna work out that way
Now, you want to cling to the next big thing
Be part of the scene and ride the big machine
Well, it ain't gonna work out that way
What, who, where were you when I was down on my luck?
You know you never gave a fuck, you just cast me aside
What, who, where were you when I needed you?
You know you never came through
And now you wanna come along for the ride
Nothing to me you're nothing to me
Nothing to me you're nothing to me
Nothing to me you're nothing to me
What, who, where were you?
What, who, where were you?
What, who, where were you when I was down on my luck?
You know you never gave a fuck, you just cast me aside
What, who, where were when I needed you ?
You know you never came through
And now you wanna come along for the ride
For the ride, for the ride, for the ride, for the
Now, you wanna come along for the ride
