4evermore

Anthony David

4evermore
Forever's a mighty long time
But I really wanna spend it with you
I shine when you shine
And there's really no substitute
4evermore
Forever's a mighty long time
But I really wanna spend it with you
I shine when you shine
And there's really no substitute
4evermore
Take a picture, I want you to remember
When I professed my love
Press the button, I hope it's still recording
Every word I'm saying to you
I'm telling you right now from this day on
I've already weighed up the pros and cons
Melanie, you're just the woman
I want, I want, I want
Making my plans just to be with you
Just you and me babe, till the days are blue
And I ain't ashamed love, to say I do, I do
4evermore
Forever's a mighty long time
But I really wanna spend it with you
I shine when you shine
And there's really no substitute
4evermore
Forever's a mighty long time
But I really wanna spend it with you
I shine when you shine
And there's really no substitute
4evermore
Pick a tree to carve our names
Let the world know it's not a game
Last longer than a wedding ring
Generations tattooed with the love we bring
From the seeds we sow
To the time it takes to grow

Long enough to show you
I won't let go of you
'Cause without you I'm incomplete
Like this love song without this beat
I'm saying that you are the man I need
I need, I need
I'm making my plans just to be with you
Just you and me babe, till the days are blue
And I ain't ashamed love, to say I do, I do
4evermore
Forever's a mighty long time
But I really wanna spend it with you
I shine when you shine
And there's really no substitute
4evermore
Forever's a mighty long time
But I really wanna spend it with you
I shine when you shine
And there's really no substitute
4evermore
Uh, yeah, it's Phontigga, yo
Take a picture off the wall, try to reframe it
Take all the color off, try to repaint it
If you want picture perfect, well we ain't it
Because we painted our own portrait
Of me and you that could never be tainted
Because real love and bodies are colors of the spectrum
Mix a few greens with your reds and your blues
Create some new youse, then you rehang it
Start over, even though your friends gon' doubt you
And all them other niggas trying to scout you
It gets so tiring but I'd be lying
If I said that I'd be better off without you
And when I think of walking out you
Smile in a way that make me feel
Like I'd be lost without you
Me and you are the only threats to us
Till death do us I'm standing next to you
4evermore
Forever's a mighty long time
But I really wanna spend it with you
I shine when you shine
And there's really no substitute
4evermore
Forever's a mighty long time

But I really wanna spend it with you
I shine when you shine
And there's really no substitute
4evermore
