

# Evil Eye

Motörhead

Look at me, what do you want?  
I'm a man, as you well know  
Evil in the air tonight, we better make it right  
Dollar for my mercy, tell you what I know  
Look see, look see, see you down upon your knees  
I see sorrow coming down, quick and sly  
You must leave don't come back, there is something on your track  
Bad magic, evil eye  
You better watch your step  
Time be getting hard if you don't go  
Rattlesnake in your hand, don't you flinch, be a man  
One silver dollar, help you if I can  
Look around, look around, look for sign there on the ground  
I see sorrow in your way by and by  
On your way lonesome road, poor boy, heavy load  
Bad magic, evil eye  
Swamp mud, can't get free  
Don't look back you don't want to see  
Voodoo coming on your trail if you live to tell the tale  
Give me a silver dollar, I'll try to make your bail  
Listen up, listen up, listen good, keep it shut  
I see petrol in the fire, flame and die  
Leave me now and change your shape, put a mask on your face  
Bad magic, evil eye
