Violent Mood Swings

Spineshank

Mother fuck the way you think
You never made sense anyway
Building up to tear it down
You're codependent on apathyBy design you fucking sterilize - so you desensitize
Make it easier to swallow
Self-involved you fucking took it all - who's gonna take the fall
'Cause it's never gonna be the same, changeDon't want to see, don't want to think
Don't want to speak for yourself
It's like a fucking disease and it showsRepetition paves the way
All for you to weaken and sedate
So contrived and watered down
A fucking shadow of what should have beenIsolate so you can separate - and fucking terminate
To diffuse the situation
Force on me a common enemy - with no identity
Now it's showing your perception too, tooYou will never see
