

Violent Mood Swings

[Spineshank](#)

Mother fuck the way you think
You never made sense anyway
Building up to tear it down
You're codependent on apathy By design you fucking sterilize - so you desensitize
Make it easier to swallow
Self-involved you fucking took it all - who's gonna take the fall
'Cause it's never gonna be the same, change Don't want to see, don't want to think
Don't want to speak for yourself
It's like a fucking disease and it shows Repetition paves the way
All for you to weaken and sedate
So contrived and watered down
A fucking shadow of what should have been Isolate so you can separate - and fucking terminate
To diffuse the situation
Force on me a common enemy - with no identity
Now it's showing your perception too, too You will never see
