

Been Through

Cloud Nothings

Nothing's working, nothing's working

Nothing's working, nothing's working

Do you feel alright?

You shouldn't

Nothing's working, nothing's working

Nothing's working, nothing's working

Nothing's working, nothing's working

Do you feel alright?

You shouldn't

Nothing's working, nothing's working You're getting older

You're getting older

You're getting older

Now You're getting older

You're getting older

You're getting older

Now I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through Nothing's working, nothing's working

Nothing's working, nothing's working

Do you feel alright?

You shouldn't

Nothing's working, nothing's working

Nothing's working, nothing's working

Nothing's working, nothing's working

Do you feel alright?

You shouldn't

Nothing's working, nothing's working You're getting older

You're getting older

You're getting older

Now You're getting older

You're getting older

You're getting older

Now I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through I am understanding but I can't believe what
you've been through

I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through
I am understanding but I can't believe what you've been through
