Been Through

Cloud Nothings

Nothing's working, nothing's working Nothing's working, nothing's working

Do you feel alright?

You shouldn't

Nothing's working, nothing's working

Nothing's working, nothing's working

Nothing's working, nothing's working

Do you feel alright?

You shouldn't

Nothing's working, nothing's working You're getting older

You're getting older

You're getting older

NowYou're getting older

You're getting older

You're getting older

NowI am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been throughNothing's working, nothing's working

Nothing's working, nothing's working

Do you feel alright?

You shouldn't

Nothing's working, nothing's working

Nothing's working, nothing's working

Nothing's working, nothing's working

Do you feel alright?

You shouldn't

Nothing's working, nothing's working You're getting older

You're getting older

You're getting older

NowYou're getting older

You're getting older

You're getting older

NowI am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been throughI am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through

I am understanding but I can't believe what you've been through I am understanding but I can't believe what you've been through
