# Take Control

## Roll Deep

We can party all night
Till the sun lights up the sky
And when the stars come out
I'll be right here by your side
I grab you by the hands and roll out, let's go now
I wanna get to a place where it goes down
Where the party starts but don't hold out
Anything goes
I wanna take you there it's all J-Los
(Yes)
Under covers, plain clothes
Yeah, we like that
(Okay)
Let me sail out
So let's bail out
And there ain't much to say
So what you say now
My life's unreal but it ain't a dream
This girl's got a body like you won't believe
I make the first move now she don't wanna leave
I thinks she likes me
I'll take the lead
One thing leads to the next
It starts off with a little kiss on the neck
Then I wake up with her arm over my chest
Thinking about last night there's never a regret
Close the door
What you waiting for
I can't believe you're here with me
Close your eyes, it's just you and I
Get ready to fly
We can party all night
Till the sun lights up the sky
And when the stars come out
I'll be right here by your side
So take control
Don't let it go, take control
'Cause you know its now or never
I'ma take control of it

I can take you anywhere
Yeah, I mean everywhere
Here, there, this, that
Tonight's special, I want you to set pace
Name a time, name a place
Okay how about here right now
Tonight's nice, I'll take you out on the town
Here's my wallet, hold down
Let's spend the night, don't hold back
You know me, babe, I'm easy
Cuddle in front of the TV
Party to your favorite CD
Grab a few bottles if need be
(Check)
Please, don't lead me on
'Cause I'm feeling you, do you read me?
I roll like, what do you, what do you [unverified]
Just give me a call when you need me
Close the door
What you waiting for?
I can't believe you're here with me
Close your eyes, it's just you and I
Get ready to fly
We can party all night
Till the sun lights up the sky
And when the stars come out
I'll be right here by your side
So take control
Don't let it go, take control
'Cause you know it's now or never
I'ma take control of it
Yo, you coulda be anywhere in the world
(Yeah)
But you're here with me
(Uh, huh)
Now there ain't no limits high life living
Now we're, out we're both in it
Stay by my side
Tonights the night that I prove you don't need no wings to fly
Suns in the sky, two stars on the ground
That's me and you so we can't stop now
(Wow)
Close the door
What you waiting for?
I can't believe you're here with me

Close your eyes, it's just you and I
Get ready to fly
We can party all night
Till the sun lights up the sky
And when the stars come out
I'll be right here by your side
So take control
Don't let it go, take control
'Cause you know it's now or never
I'ma take control of it
