

Fountain of Youth

Savatage

Do you suffer from the fears of growing old?
Do you wonder what might happen to your soul?
There is a magic place
That just might solve your case
And it's, it's just a mystery to the mind, yeahThe fountain of youth
That's where we might find the truth
It's gonna put your head in a rush
And the science is working on usPonce DeLeon, in the search for the gold
Indian tales, never growing old
By the walls and the springs
Hear a voice of yesterday sing
It's just a mystery to the mind, yeahThe fountain of youth
That's where we might find the truth
It's gonna put your head in a rush
And the science is working on usIt is part of the power, power of the night
It's where the sun beats down on the [Incomprehensible]
As they're trying to get it right
In tales a magic place, I saw the vision of a face
It solved the mysteries in my mind, yeahThe fountain of youth
That's where we might find the truth
It's gonna put your head in a rush
And the science is working on us
