Shine

Meredith Brooks

Lucky that you found me
You gotta hang around me some more
'Cause I'll remind you, I'll be around
While you're waging your war with yourselfAnd I see it clearer than you see it
You gotta get out of your head to believe it
Oh I know something about you
You don't know I knowThat's where you shine
When you're sinking you swim
When you see your way out instead of inThat's where you shine
Like a diamond in the rough
You're always so resilientThat's where you shine
When you're walking the edge
No one's ever gonna catch you stumbling
That's where you shine, shineRemember when you told me
To get up and dust yourself off
It wasn't easy, everything can change
And it usually does, it doesYou said, shake it off like it ain't no big thing
Won't be the last time we're sinking
Oh, I know some things about you
You don't knowThat's where you shine
When you think you've had enough
Just a matter of time before you fadeThat's where you shine
Like a clear in the brush
Like a headlight breaking through the hazeThat's where you shine
When there's nothing but no
And there's nowhere to go, you find a way
That's where you shine, shineSometimes you need someone to see yourself clearer
There's no reflection when it's you inside the mirror
I know something about you don't knowThat's where you shine
When you're sinking you swim
When you see your way out instead of inThat's where you shine
Like a diamond in the rough
You're always so resilientThat's where you shine
When you're walking the edge
No one's ever gonna catch you stumbling
That's where you shine, shineThat's where you shine
When you think you've had enough
Just a matter of time before you fadeThat's where you shine
Like a clear in the brush

Like a headlight breaking through the hazeThat's where you shine
When there's nothing but no
And there's nowhere to go, you find a way
That's where you shine,Yeah shine, shine
Oh, that's the way you shine
