

Something Epic

This Rigid Empire

If I could be I would have to be the one the one that never was
Always flying never dying because I would be the one
Pain and noises in my head it hurts I need to speed up
Moving faster, Sarah Caster until all the noises stop

So here we go again
Never knowing when
Should we follow plan
Or just give up again
Never knowing why
Should we even try
I'm still holding on
But I won't be waiting long

On the top we're on the top we'll keep it all aflow
Falling from the centre stage they all cried so long ago
I wish that I could just be free and fly right out through the gate
This is the moment I've been waiting for and I hope I'm not too late

It's going to snow tonight
I hope you'll be alright
I want it all for you but
We're hiding in the shadows
All the things I see
Your life's a mystery
It's like my favourite songs
All drowning in our sorrow
Drowning in our sorrow in a cave
