

What Could Have Been

Ginuwine

Seen you the other day, still looking so fine
Hating that I lost what I had in you
If I could turn back time I would make a change
And never do the things that I done to you I see you're doing good
Shawty, your career is taking off like mine
And what we could have done together
What a shame, I'm 'bout to lose my mind It's starting to hit me now
All I think about is what could've been
And I just sit around thinking about you
Only what could've been It could've been us with the kids, house on the hill
You the First Lady and I'm the President
Now all that I did, not worth this
Thinking 'bout what could've been, thinking 'bout what could've been I'm reflecting on the past, that special
thing we had
I should've worked it out, oh
I just couldn't see it then but seeing you with him
I know his name's on it now And I been through all the change, it's grown man nowadays
I wanna settle down, down
Memories playin' in my head, so many things I said
Wish we could talk about It's starting to hit me now, oh girl
All I think about is what could've been
And then I just sit around thinkin' about you
Only what could've been It could've been us with the kids, house on the hill
You the First Lady and I'm the President
Now all that I did, not worth this
Thinking 'bout what could've been, thinking 'bout what could've been I didn't appreciate when you were mine
And now I'm askin' God, just once, turn back the hands of time, yeah
So I can fix some wrongs, give me another, give us another chance
Girl, I'm just can't live without you, been living with regrets
I guess it wasn't meant, I'm stuck here wondering if It's starting to hit me now, oh girl
All I think about is what could've been
And then I just sit around thinkin' about you
Only what could've been It could've been us with the kids, house on the hill
You the First Lady and I'm the President
Now all that I did, not worth this
Thinking 'bout what could've been, thinking 'bout what could've been It's starting to hit me now
All I think about is what could've been
And then I just sit around thinkin' about you
Only what could've been It could've been us with the kids, house on the hill

You the First Lady and I'm the President
Now all that I did, not worth this
