Come and Get It

Overkill

Think that I know you, but I just can't place the face
Got something to show you, it can never be replaced
Wherever we walk, wherever we fly
Wherever we live, wherever we die
Think that I know you, but I just can't say goodbyeThis is it
Hey now, don't it make you feel better? Come and get it!
This is it
Here we go, we going to fly
Come and get it!
This is it
Hey now, don't it make you feel better? Come and get it!
This is it
Here we go, we going high
Come and get it!Remember the rising when the lightning filled the air
No compromising in a strapped electric chair, you were there
We never could walk, we always could fly
We never could live, we always could die
Think that I know you but I just can't talk, too high
Think that I know you but I just talk too high
Over your horse and rideDo you know a better way to make it all good inside?
All the friends have died away, by a new law they abide
And all Gods' children, there they go, judgement on their side
Do you know a better way, to make it all good inside?
And I cry does it make you feel better, sing it
