Elevators Are Matchmakers

June

Didn't think to get an answer
I'll say what you wanna hear
You know that I am better than thatBut the silence is awkward
And I've been, I've been just fine
How about you?Start a little conversation, I'm sorry
I'm going up are you going down or are you in or out?
We'll have to wait and see nowI got a question but I didn't mean to interrupt
Tried to figure you out, not cut you off
I'm sorry, I will wait, I'm sorry, I willCan you really think just how this feels?
All I wanted, all I wanted was your time
Can you really think just how this feels?Can you really think just how this feels?
All I wanted was your time
'Cause I know you got an answer set asideDidn't think to get you want
Say what you have to say
Keep it together, you know I didn't mean to interruptBut I can fill you with the lies
And you know, you know
How I keep this conversation going on and onAnd I know that your starving for more
But your foot's out the door or are you in or out?
We'll just have to wait and see nowI got a question but I didn't mean to interrupt
Tried to figure you out, not cut you off
I'm sorry, I will wait and I'm sorry, I willCan you really think just how this feels?
All I wanted, all I wanted was your time
Can you really think just how this feels?Can you really think just how this feels?
All I wanted was your time
'Cause I know you got an answer set asideTry to figure you out, I can, I can
When you always ask for more, I can, I can
Try to figure you out, I can, I can
(All I wanted was your time)
When you always ask for more, I can, I can
(All I wanted was your time)I got a question but I didn't mean to interrupt
(Can you really think just how this feels)
Tried to figure you out, not cut you off
(Can you really think just how this feels)
I'm sorry, I will wait and I'm sorry, I willCan you really think just how this feels?
All I wanted, all I wanted was your time
Can you really think just how this feels?Can you really think just how this feels?
All I wanted was your time
'Cause I know you got an answer set aside
