Bell

Avail

the birmingham sun it burned me through i thought of you and with every step i've made mistakes you've seen me though you've seen me true all these towns are lonesome all their streets the same every rain's a downpour i'm nearly washed away as i wait this mornings news it seemed untrue but it's safe with you and with every step i've made mistakes you've seen me through you've seen me true all these towns are lonesome all these streets are same every rain's a downpour when i've nearly washed away you've kept me sane
