Empty Hearts

John MacArthur

So save all of your light
For those who can't sleep at night
And who can't even sing to their shadows
Oh they ride into town
And they throw the shots down
And they save the last round for the windowsSinging don't let me into this year with an empty heart
With an empty heart
Don't let me into this year with an empty heartI'm inside with my friends
We build fires and pretend
That the night could just bend on forever
While outside in the frost
Are the wolves and the lost
And we sing to the dogs or whoeverSinging don't let me into this year with an empty heart
With an empty heart
Don't let me into this year with an empty heartThere's a friend that I have
And for her I'll go back
You see all of these empties that I'm holding
They're too much for a man
Empty arms, empty hands
And she'll know me by the sound of my hopingSinging don't let me into this year with an empty heart
With an empty heart
Don't let me into this year with an empty heart
