

Wicked Witch

Beatsteaks

Wicked Witch I can drink you under
Any goddamn table you want What used to be romantic
and what I took for granted
You can have it all
What more could you be asking for
When you can have it all
You can have it all
You can have it all
You can have it all A drowning man takes down those nearest
I take you down too if you even existed Together forever
Together forever What used to be romantic
and what I took for granted
You can have it all
What more could you be asking for
When you can have it all You can have it all
You can have it all
You can have it all Wicked Witch
