

# Where Have You Gone

## Edgar Winter; The Edgar Winter Group

I-----I got a feeling,  
deeper emotion I'm not the only one-  
So cut the pain until its gone-Time----where have you gone now,  
seems just like yesterday caught up wit you,  
up with youso predict my heartache,  
songs of a love gone wrong,  
and in the end its tragic,  
but so appropriate indeed,  
but never the less the ending is fate.barely alive----afraid of feelin,  
pick me apart now, find someone else to blame,  
wallow in shame until its gone.time----where have you gone now,  
seems just like yesterday caught up with you.as we wait for the next forever,  
perhaps our day will finally find,  
and make its heart never surrender,  
if they truly want to shine,  
you walked out that front door,  
into the back of my mind.time---where have you gone now,  
seems just like yesterday caught up with you
