

She's a Riot

The Jungle Giants

I found you here
Right beside me
Saying all the things you've never done
There's not much time than less to say
Oh please just come away You can be my lady
And we'll walk the streets for no reason maybe
Just till you see you won't be so lonely
When you're with me
You won't ever be so lonely She's well known to police
Cause she looks like a riot
Always takes what she needs
And leaves the rest behind
Oh this love will kill me
But I don't think I might
Blame it on the way we
Don't even care
We know we'll be alright
Alright, yeah We fall asleep in the morning light
Oh and when we dream we just might
Find a way to make sense of everything we've seen
Tonight You can be my lady
And we'll walk the streets for no reason maybe
Just till you see you won't be so lonely
When you're with me
You won't ever be so lonely She's well known to police
Cause she looks like a riot
Always takes what she needs
And leaves the rest behind
Oh this love will kill me
But I don't think I might
Blame it on the way we
Don't even care
We know we'll be alright
Be alright, be alright
We'll be alright Wake up
Turn around
You're my girl
If you stick with me
Then you won't ever be so lonely She's well known to police

Cause she looks like a riot
Always takes what she needs
And leaves the rest behind
Oh this love will kill me
But I don't think I might
Blame it on the way we
Don't even care
We know we'll be alright
Alright, yeah
Alright, alright
Alright
