

How's Your Heart Doing

[Sophie Zelmani](#)

People talk about you
I've got memories
There is something about you
I know what it is
How is your heart doing? Oh, they make me think of you
Nowadays, that feels good
Moments are coming back to me
They're closer than they should
How is your heart doing?
But I'm not welcome no more
How is your heart doing?
Just wondering, that's all I was so young when I fell for you
You must've shaped my heart
But youth is for that history
And life does need new starts
How is your heart doing?
The one I was dying for
How is your heart doing?
I'm wondering, that's all
How is your heart doing?
How is your heart doing?
How is your heart doing?
How is your heart doing?
