

# Silent Scream

## Burning Point

Nightmare, mass depression, silent screams out there  
Dammit, into darkness something that'll never rise  
Darkness, in this something that the world that follows rhyme  
Impetrate, simplest wine, deep within my spine  
Silent scream, tearing it up in time  
It'll die sucking the part where it'll die  
Shout another time, evil hard knock game  
Mistake, mistaken, something that's chewing you down  
Scared of dangers of light, bury tainted guy  
Grain suffers rhyme, hard is something that is destroyed  
Silent scream, the worst of the bitterest sound

Evil does the light turn into stow  
Light, free of dead, humanity mayday  
Destruction to the end show  
Preserved the nastiest prey, wake me up and down  
Infinity to prey, selection to the later  
It brought us the end of the day  
Nightmare, mass depression, silent screams out there  
Dammit, into darkness, something that'll never rise  
Innocent, we're all gonna die  
Silent scream, it's the end of light
