

# White Flag

## The Ministers!

Took the acid in the afternoon  
Just to be part of the scenery with all the lonely People there we are  
Took a trip out to the galaxy  
I'm not looking for salvation just a taste of liberation  
I said my friends  
Like to sit all day and watch the stars bend  
I can see your white flag flying in the distance  
I know that it's lonely there where you are  
If everything is perfect tell me why you're hurting  
It won't be long  
Took a trip out to the girly show  
It was there i talked to jesus he said christ Don't you believe it  
Another drink and we talked all night

I asked does it hurt to be you he said boy it hurts like hell  
He said my friends  
Like to sit all day and watch the stars bend  
I can see your white flag flying in the distance  
I know that you're lonely there where you are  
If everything's so perfect tell me why you're hurting  
It won't be long  
Three am and the light's so strange  
Little rosa's started dancing now with all the lonely people there we are  
Leans to me asks for a cigarette  
I asked does it hurt to be you  
She said boy it hurts like hell  
She said my friends like to sit all day and watch the stars bend
