

Watch It Die

Bad Religion

I was born on Planet Earth
The rotating ball where man comes first
It's been around for a long, long time
But now it's time to watch it die I saw a man on my big blue screen
He ruled the world economy
He said the rich would never concede
But some day soon he'll be put to sleep I've seen the life of the forest green
And adaptations of the deep blue sea
And who knows who is the fittest
They will all soon be put to rest On a plunging flight and we're sitting in the pilots seat
In the midst of life
People on a dark horizon praying
Somebody will save their lives
