

Watch Your Step

Matthew Ryan

Well you sent me running
For cover, deep in those dark and lonely hallways of my heart
And there were problems
You said there was something wrong with me
And they were deep-seated they were deep-rooted
I must've pushed 'em away I pushed 'em away
So you left with the impression that if I could just clear my head
You'd be back with me on day
But now you walk the roads with a rose in your teeth
Walking arm and arm with him it's hard to believe that I'm the furthest
Thing from your mind Well if those dark clouds haven't come rolling in yet
Come on baby you know better than that
In life there's a lot of high grass and deep wet sane
You just trudge through the best that you can And remember
To watch your step
You can take it on the run now babe
Cause you'll throw it away, you'll throw it away
You can take it on the run now babe
Cause you'll throw it away, you'll throw it away
You can take it on the run now babe
Cause you'll throw it away
Just like you threw me away Well if those dark clouds haven't come rolling in yet
Come on baby you know better than that
In life there's a lot of high grass and deep wet sane
You just trudge through the best that you can
