# Truly Great Thing

## Sebadoh

1, 2Make it easy and Ill hold it against you
Im on a string dangled right in front of you
Make it hard and Ill run away
Keep tomorrow as I kill todayTrying to figure just what I deserve
Slashing lines all across the earth
Patience only makes the dream come true
Everything I see, I hold to youTell me, this is it, the truly great thing
The love youve hoped to find
Any doubt will simply wipe itself out
As were rising deeper the first and last timeLift me up and drop me down again
Every day I feel confusion, pain
And love is what weve all been waiting for
Something powerful to smash it all apartCant love if youre locked up tight
The dream of perfection, nothing ever seems right
All the world will tell you, youre all wrong
Big, big deal if youre wrongThis is it, the truly great thing
The love youve hoped to find
And any doubt will simply wipe itself out
To rising deeper the first and last time
