

In Nephritic Blue

Haemorrhage

Macerating in cellular reject
Toxic liquids are deadly retained
Incrustation of crescent nephrite
poisoned cruor uroemic fomiteNephrosis...
In nephrotic blue...
The color...
Of my dead tissuesStrangulation of renal conducts
Pungent vomit of hepatic fluids
Intoxicated by cirrhoetic foam
Subit spasm my liver I disgorgeRigor mortis muscles stiff
Now my urine starts to flow free... (repeat).
