

Beyond The Surface

Kutless

I've been hiding, hiding for so long
Right behind my digital mask
I've been trying to be someone I'm not
All these perfectly fake people
Push us to insane ideals
They're nothing more than counterfeit images
That push me away
To bleed out the pain
Don't you dare to make another move
Put the knife away
That's not what anybody needs
There's a better way
Than everything now that you see
Stop comparing who you are
To who you want to be
Let's step out beyond the surface
Don't give in to everything
The world around tells you to be
Open up your mind, release your self
Stop the lying, stop comparing

Who you are to what you see
Never letting fear hold back the change
And push you away
To bleed out the pain
Don't you dare to make another move
Put the knife away
That's not what anybody needs
There's a better way
Than everything now that you see
Stop comparing who you are
To who you want to be
And step out beyond the surface
Put the knife away
That's not what anybody needs
There's a better way
Than everything now that you see
Stop comparing who you are
To who you want to be

And step out beyond the surface
