

Dark Days

The Used

I've seen the way that the sun sets in your face
Our love is too big for us to break
You've got me wishing for the stars in outer space
I'm holding onto this life and love and for
The possibility, you and me, let me be I need to find a way
To put this struggle behind us
Can't spend my life in shame
Making light of these dark days I've seen the way that the rain spits in your face
Just falling upon your lips to taste
If I could give to you the stars in outer space
I'm holding onto this life and love and for
The possibility, you and me, let me be I need to find a way
To put this struggle behind us
Can't spend my life in shame
Making light of these dark days Another time and place
To put this struggle behind us
Can't spend my life in shame
Making light of these dark days So far away, so far away
So far away Look into your heart
And let time heal this pain
We're not so far away
We're not so far away The possibility, you and me, let me be I need to find a way
To put this struggle behind us
Can't spend my life in shame
Making light of these dark days Another time and place
To put this struggle behind us
Can't spend my life in shame
Making light of these dark, light of these dark
Light of these dark days All as one, you made me come home
And all this, I'm one to never follow
In all this, I'm one who will ever love you
All this I'm done, all this I'm done
