

Higher

Dexter Freebish

She was drivin' the car, one thumb on the wheel
Cigarette burnin', life to her was no big deal
Her thin, white tank top was almost see through
I've always been attracted to her butterfly tattoo I wanted to know her
I knew that she could show me the way, yeah She could take me high, higher than I've ever gone
She could take me high, higher than I've ever flown Well, then the top was down, the sun was on our necks
I'm usually driving but today there are no regrets
We were going someplace and she could lead me there
I can see her depth once you peel away the layers I wanted to know her
I knew that she could show me the way, yeah She could take me high, higher than I've ever gone
She could take me high, higher than I've ever flown I never thought I could feel this way
Ain't gonna look back on yesterday, no
I see the world open up for me
It's in her eyes as she looks at me, yeah
And now I know what I am here for, yeah, I know She could take me high, higher than I've ever gone
She could take me high, higher than I've ever flown She could take me high, higher than I've ever gone
Yet she could take me, oh she could take me higher
Yeah, yeah, yeah, oh
