

# Perfect Dream

## Trapt

Looking around  
Wondering what this is for  
Sure it's fine but i don't think i need this anymore  
I took down my self appearance  
And i found the definate clearance  
I'm getting bored  
inspiration is drained  
Till i see your face is boredom  
beside me...

:Chorus:

Feel this

Once one more to  
Make sure its not a dream  
I can't stand here any longer  
Please don't wake me up  
Your such a perfect dream  
of all i ever...  
Wanted at all  
Bringing me down  
A flow as the glass hits the floor  
Shattered pieces  
It's not what it used to be anymore

Rided it out on broken pieces  
Tell me now what is your thesis  
I need it more  
To make it through the day  
Till i see your face is boredom  
beside me.....

:Chorus:

I never met this dream...

Reality

Once I fall inside of you  
Again its so hard  
To keep my mind off of you  
To keep my arms off of you  
So unreal  
So surreal  
But, You're just a dream

You're far away  
Boredom will follow around me again
