

Superman

Johnny Whiteside

I walk this lonely road tonight waiting for you
Dont leave me in the dark tonight
Ive seen youre pretty face somewhere before
So hypnotic so exotic tooI know what is coming I can except my fate tonight
I know that tonightIll be youre superman baby Ill take away youre pain
Ill be youre superman honey Ill save the world today
Ill be youre superman even when no one can
I can see straight through you and you know it toSupermanWhy would you put yourself in a situation
Wth guys that dont care
Dont you know that I will always be there
Ill lift you up when they will put you down
Ill take that sad frown and turn it upside down
Dont you know that I can turn this thing aroundI know what is coming I can except my fate tonight
I know that tonightIll be youre superman baby Ill take away youre pain
Ill be youre superman honey Ill save the world today
Ill be youre superman even when no one can
I can see straight through you and you know it toSuperman
