

# Star Sign

## Theoretics

Hey, there's a horseshoe on my door, big deal  
And say, there's a black cat on the floor, big deal  
If these things make your day  
Well, if these things change your day  
Well, do you know where you belong?  
And is your star sign ever wrong?  
If these things change your day  
Well, if these things make your day  
Seen it all before, seen it all before  
In a time these things will change  
Hey, there's a side of me unknown, big deal  
And say, should this unknown force be shown, big deal  
If these thoughts make your day  
Well, if these thoughts change your day  
Seen it all before, seen it all before  
Given time these things will change  
Seen it all before, seen it all before  
Given time these things will change  
If these things change your day  
Well, if this song makes your day  
Seen it all before, seen it all before  
Given time these things will change  
Seen it all before, seen it all before  
Given time these things will change
