

# Something About Us

[Clay Aiken](#)

Stop the music, play the song  
And we'll dance together all night long  
Spotlight glows, somehow it knows  
That there's something about us, something about us  
People smile when they walk by  
There's too much magic to deny  
A fool can see we're meant to be  
There's something about us, something about us  
The words on every poet's tongue  
Every love song ever sung is about us, it's about us  
From Romeo and Juliet to plays they haven't written yet  
It's old and new, it's a classic tale of two in a perfectly perfect love  
You can see it in our way  
In how we spend our nights and days  
A crazy laugh, a photograph  
There's just something about us, something about us  
The words on every poet's tongue  
Every love song ever sung is about us, it's about us  
From Romeo and Juliet to plays they haven't written yet  
It's old and new, it's a classic tale of two in a perfectly perfect love  
Stop the music, play the song  
And we'll dance together all night long  
We'll reminisce of moments like this  
'Cause there's something about us  
Yes, there's something about us  
Oh, there's something about us
