

# Tried And True

Ween

At the dawn I woke, I was alone rising  
I called upon the force of time and space, calling  
And as she came to me I fell back down realizing  
Oh, that it's cool for you to love me now I'm everything Everything 'cause tried and true, I see the light in you  
Oh, can you dig in my soul, could you smell my whole life? You bent the edge, eclipsed and turned around  
aligning  
And though the dark sparked rays of violet light blinding  
I went about the job of sowing thoughts and feelings  
Oh, some were good and some bad, I felt the cries of healing 'Cause tried and true, I see the light in you  
Oh, can you dig in my soul, could you smell my whole life? Rise, my dawn, you've been awake too long  
Let me rest in time while I blow your mind At the dawn I woke I was alone rising, I catch it  
I called upon the force of time and space calling, see them  
And as she came to me I fell back down realizing, creation  
Oh, that it's cool for you to love me now I'm everything, I am Everything 'cause tried and true, I see the light in  
you  
Oh, can you dig in my soul, could you smell my whole life?
