

Weight of the World (feat. Blaque Keyz)

Jon Bellion

[Verse 1: Jon Bellion]

We're six feet underground inside my bed

And all the little letters in my head

We're spelling suicide but not by choice

Was calling out for help, but heard no noise, no noise[Pre-Chorus 1: Jon Bellion]

Only the sound of my back breaking

But ever since you and your arms saved me[Chorus: Jon Bellion]

I don't hold the weight of the world anymore

I don't hold the weight of the world anymore

I don't hold the weight of the world anymore

I don't hold the weight of the world anymore[Verse 2: Jon Bellion]

The only friend I had wore black and red

The darker instruments inside my head

We're playing suicide but not by choice, by choice

Was calling out for help, but heard no noise, no noise[Pre-Chorus 2: Jon Bellion]

Only the sound of my hands shaking

But ever since you and your arms saved me[Chorus: Jon Bellion]

I don't hold the weight of the world anymore

I don't hold the weight of the world anymore

I don't hold the weight of the world anymore

I don't hold the weight of the world anymore[Break: Jon Bellion]

Don't hold the weight of the world

I don't hold the weight, I don't hold the weight[Verse 3: Blaque Keyz]

This the flow that helped me tip the scale

I'm stackin' chips like Chippendale's without the strippin'

Get the bailiff out cause Mr. Bellion's out to sell

We skip the bail and out the jail

We hit the trail, the route we took is hard to smell it out, so get to sniffin'

Equipped with the gift of spit like the lisp on a chicken plate and a flick mixed with Spiderman

I'm brighter than LEDs on your TV

Keyz is sharp as a dagger

Who walks around with a swagger of Kenny G [?]

Chill with the chatter

Got the skill of a master craftsman whose passion is rappin'

Snackin' on actors, so pass me a napkin

Chip on the shoulder, the kid is colder than both Dakotas

The winter soldier, assassin coming after your captain for honor

And every day, I'm getting stronger

No one will shock the world, got a buzz like a mini [?]

When they apply the pressure, it's heavier than [?]
Got what it takes to be great, but can't hold this weight any long
