Constant

Quantec

I've worked for so long
With the weakest of hands on the coldest of shores
The wind and the rain fill me with doubt
But You've never been wrong before
I prayed for the sun
Some guidance, some truth
Some glimpse of the things to come
With only your song
Your love made me strong
When all hope was gone
All through the night I was falling
Straining to hear Your voice calling
You never gave up, You never gave in
You never quite gave up on me
You are my constant
We always want time
To hoard up our treasures and bury our dead
It's true what He said, foxes have holes
But the King has no place for His head
I pray for relief
But relief doesn't come
Just the will to press on
With only Your song
Your love makes me strong

When all hope is gone
All through the night I was falling
Straining to hear Your voice calling
You never gave up, You never gave in
You never quite gave up on me
You are my constant
All through the night
Your love is faithful to me
All through the night
Your love is right here with me
All through the night
Your love is holding me
All through the night I was falling
Straining to see Your light shining

You never gave up, You never gave in
You never quite gave up on me
You are my constant
All through the night I was falling
Straining to see Your light shining
You never gave up, You never gave in
You never quite gave up on me
You are my constant
You are my constant
You are my constant
You are my constant
