

# Meteorites

## Lights

Perseids lead us up to it  
Remind me is where kind leve  
Both of us are leaving town when we get old enough  
We're moving on We are gonna see greater heights  
They'll put our names up in neon lights  
Rolling volcanoes in the night  
Glowing in the dark like meteorites  
We're volcanoes in the night  
We're rolling like meteorites Momma said they haven't even seen nothing yet  
Don't you forget  
Lately you've been breathing fire in your sleep  
I feel the heat We are gonna see greater heights  
They'll put our names up in neon lights  
Rolling volcanoes in the night  
Glowing in the dark like meteorites  
We're volcanoes in the night  
We're rolling like meteorites The greatest sights that I've ever seen  
And I've laid eyes in big limousines  
And maybe we sound young and naive  
And maybe we just want to believe We're volcanoes in the night  
We're rolling like meteorites We are gonna see greater heights  
They'll put our names up in neon lights  
Rolling volcanoes in the night  
Glowing in the dark like meteorites  
We're volcanoes in the night  
We're rolling like meteorites
