Babble On

ComboNation

They argue and they theorize their conclusions
Postulating formulating laws to break
Interpreting the intents of two faced governments
Painting brighter futures that will never happen

They say their vision is sound
Don't they know the world's too sound to turn around

Policies they push as they babble on
Change every other day
Futures they decide as they babble on
And favors they repay
Policies they push as they babble on

Just reinforce their right but they are never right
They're wrong to babble on

Compromising treaties to end hostilities
That spark again as white lies are turning black
Seeing all the failures hearing all the cures
Temporary remedies for a world disease

They don't know how poverty feels
They're too busy making all their worldly deals

Policies they push as they babble on
Change every other day
Futures they decide as they babble on
And favors they repay
Solutions they derive as they babble on

Just reinforce their right but they are never right
They're wrong to babble on
