Extra Astronomical

Klaxons

Celestial catastrophe
Orbiting machines
Entropy evaporates
Absorbing the obscene
Reoccurring collision, glowing
Glowing collisions, reoccurring
Approaching systems now visible
Heading for nowhere near home
Extra astronomical
Searches seem to show
Damage to solar winds where the air uncovers
Melting on the star pole snow
Celestial catastrophe
Orbiting machines
Entropy evaporates
Absorbing the obscene
Reoccurring collision glowing
Glowing collision reoccurring
Approaching systems now visible
Heading for nowhere near home
Approaching Phobos, now visible
Stresses to systems are known
Extra astronomical
Searches seem to show
Damage to solar winds where the air uncovers
Melting on the star pole snow
Celestial catastrophe
Extra astronomical
Searches seem to show
Damage to solar winds where the air uncovers
Melting on the star pole snow
Extra astronomical
Searches seem to show
Damage to solar winds where the air uncovers
Melting on the star pole snow
Reoccurring collision glowing
Glowing collision reoccurring
