Fly Here Now

Leona Lewis

Doesn't matter what you say
Just tell me what would you do
When I miss you like this, baby
Gotta teleport your molecules
Give you wings so you could fly highI'd give you wings so you could fly to me across the sky
I'm tired of talking, baby
Say yes or no, not maybe, I need your body here with me
I need your body here with meThis might sound crazy but just fly here right now
Glide like an aeroplane and just fly here right now, nowThere's nothing there to hold you down
There's nobody that's strong enough
Aren't you tired of living on the ground?
Well, tonight we're going to live it up
Take a trip across the sky, high
Spread your wings and flyThis ain't a hard decision
You're stronger than jet engines
There's no excuse for you to be
There's no excuse for you to be so far from meThis might sound crazy but just fly here right now
Glide like an aeroplane, yeah, just fly here right nowPeople say that we, we can't fly
But we can defy gravity, tonight we'll fly
People say that we, we can't fly
But we can defy gravity
If we can just do something crazyThis might sound crazy but just fly here right now
Glide like an aeroplane, just fly here right now
This might sound crazy but just fly here right now
Glide like an aeroplane and just fly here right now
