

Ghosts

Robbie Williams

Here I stand, victorious
The only man who made you come
When you cried, you cried for us
And when we died you died alone Gravity's calling
Don't go home
Where are we? Did what I could for one of us
I always thought it was for you
And when I lied, oh, I lied for us
Because you never heard the truth I'm lying alone tonight
Don't go home
Where are we
If we are ghosts? A long long time ago
(It looks like we could have made it babe)
We are ghosts
A long long time ago
(Me and you)
We are ghosts A long long time ago
(We could have made it)
We are ghosts
A long long time
(Me and you)
Ago Look at the time it's taken me
To get away from what was said
I'll never leave, I'll always love
You know that all those words are dead Buried at yours tonight
Move aside
I'm taking you home On the radio she was that 'Summer Song'
Packing them in, making them dance
A law of her own Taking the time to sing it
I don't need you but I'm lost
Lost without you tonight
Have you no heart?
Where are we? Hold a love like ghosts
(We are ghosts)
They are taking down our satellite
(We are ghosts) Josephine I follow your star tonight
(We are ghosts)
If not tonight then when will she say
We're not ghosts
