

It's the Little Things

Sonny & Cher

You're not the kind of guy
That make the girls all sigh
And they never turn their heads
And looked when you walked by But baby, that's okay
I love you anyway
And I never change or rearrange you
So stay that way 'Cause it's the little things
That mean a lot
It's what you are
Not what you got Call my name and I'll come running
Look at me and the clouds start sunning
Hold my hand and you got me going
Kiss my lips and my mind starts glowing We got a thing that won't stop cooking
You turn me on just by looking
You can make me strong just by sighing
You can break my heart just by crying You're not the smartest man that I've ever met
And every word you ever said I won't forget
And so I guess that's why until the day I die
When you're bad and make me sad
You're still my guy 'Cause it's the little things, oh, that mean a lot
It's what you are, not what you got Call my name and I'll come running
Look at me and the clouds start sunning
Hold my hand and you got me going
Kiss my lips and my mind starts glowing We got a thing that won't stop cooking
You turn me on, baby, just by looking
You can make me strong just by sighing
Break my heart, baby, just by crying
Baby
