Tonight

Ace Troubleshooter

Starry, starry night
The silver beams the only light
Summer breeze, summer dreams
Float over meThe stars frame her silhouette
Beauty steals away my breath
This moment will last forever, forever
ForeverThere is no time but now
There is nowhere else but right hereTime has lost its grip tonight
Beautiful enchantment
I just might hold her, hold her close
Never let her goThe tenderness in her eyes
Her hair is drenched with silver moonlight
Half-spoken thoughts forget-me-nots
She's the jewel I've sought
She's the jewel I've soughtThere is no time but now
There is nowhere else but right here
When all else is cold
The warmth of holding her nearTonight the stars in her eyes
Outshine the stars in the sky
Tonight love is in her eyes
I'll hold, hold her close tonightThere is no time but now
There is nowhere else but right here
When all else is cold
The warmth of holding her nearTonight the stars in her eyes
Outshine the stars in the sky
Tonight love is in her eyes
I'll hold, hold her close tonightTonight
Tonight
Tonight
...
