

Love Like You (Live at Pandora)

Eric Hutchinson

Open my eyes and there you are
Out in the distance sun and the stars
And I feel the way is going to be
Reach out let your heart go free
This is just you and me I've been waiting for a love like you
I've been waiting for a love like you
I've been waiting for a love like you tonight Broke I was a little bit broke
Was a little bit broke was a little bit broke
I was broken and you came my way
There's nothing you can ever say
I'm in it to stay I've been waiting for a love like you
I've been waiting for a love like you
So let me catch fire and blow off stem
This is a crash landing we're living the dream Let me ask a question wheels to the sky
Standing at a crossroads look into my eyes
And anybody out there can plainly see
Oh your never going to know what you do to me
Yes you do and I say and I say it I've been waiting for a love like you
I've been waiting for a love like you
I've been waiting for a love like you tonight So let me catch fire and blow off stem
This a crash landing we're living the dream
We can freak out if you know what I mean
We can go where we go where the loves supreme
I said oh baby I never forget
I said now oh baby I never forget
What you did for me now how you making me feel
And I've been waiting for a love that is finally real I said now I've been waiting for a love I've been waiting for
a love like you
I've been waiting for love like you love like you tonight
I've been waiting for a love like you
I've been waiting for a love like you
I've been waiting for a love like you baby
