Red Planet

Alvvays

It's been almost 20 years on the red planet
A place where there are no tears, it is just water floating
No, they're not quite emotingI dream of the other days, of the times I held you
Left in an autumn blaze, now I idle in bubbles
Just collecting the rumbleWell I waited for you out here, but that was just delusional
And I painted all these pictures of earth but that's unusual
Unusual to youMet at a seminar, shared the same table
Brushed by you at the bar, didn't match your discretion
Soon became my prescriptionI think of the junipers in the spring growing
Fall up on Jupiter, it doesn't draw a reaction
Temporary distractionAnd I've waited for you out here, but that may be delusional
And I painted all these pictures of earth but that's unusual
Unusual to youUnusual, unusual, unusual to youAnd I waited for forever, and that was just delusional
So I painted all these pictures of earth but that's unusual
Unusual, unusual, unusual to you
